RAILROAD BALLAST STABILIZATION
ROCK STYLE CARPET, 12' LENGTH
NOT TO SCALE

The Rock Carpet product would be utilized to handle a reoccurring failure (erosion) spaulding of an original wall or railroad track infrastructure. The rock carpet could provide additional structural integrity to installation trouble spots.

The Rock Carpet is designed to be installed on banks, dikes, embankments, to maintain designed stability to areas that are prone to failure from erosion and other weather hazards.

STONE BLOCK FACE DESIGN:
